

**Michigan Prospect**  
 Northeast trending corridor of quartz-stibnite-arsenopyrite veining. 2019 RAB drilling intersected a broad, northwest dipping mineralized structure in the centre of the prospect. 2020 priority drill target.

43.8 g/t Au rock

Michigan Camp

Tectonic Discovery (2019)  
 6.03 g/t Au over 28.95m

989.6 g/t Au rock

**Drilling**

- Initial Planned 2020 RAB Hole
- 2019 RAB Drill Hole
- Historic Diamond Drill Hole

**Soil Geochem**

- Au\_ppb
